Fall 1947 • Spring 1948

**SHIPPING POINT
SEMMES, ALA.**

**Telegraph and Telephone:
Mobile, Ala., 6-9937**

*Member of American Association of Nurserymen and Other State
and Local Organizations to Promote the Cause of the Industry*

Our Nurseries are located at Semmes, 15 miles northwest of Mobile on Moffat Road.
Come visit with us sometime; we will be glad to show you around.

Our Business Terms

Prices. All prices are net and when cash accompanies the order, no charge will be made for packing. Otherwise a charge will be made for packing based on cost. No order accepted for less than 25 plants of any one variety of liners.

Carload or truck orders, where we do not have to crate the plants, will carry a 20% discount from catalog prices on B&B stock. NOT on liners or any bare-root stock.

Charge accounts. From unknown persons who have not established credit with us, we ask for well-known trade reference and time for investigating. All accounts are due on receipt of invoice unless other arrangements are made when order is filled.

C.O.D. Shipments. Must be accompanied by 25% deposit and will be considered as cash shipments. If you want us to hold certain items for you, we require deposit of 25%.

Shipments. Please specify by what method you want your order shipped. We will endeavor at all times to send out all orders as near the date specified as possible and will do everything in our power to insure satisfactory delivery to our customers, but our responsibility ceases upon delivery to carrier in good condition, insofar as damages in transit are concerned. However, we are here to please our customers and will at all times do all we possibly can to help, should you have to file claim for any damages.

If you have any reason to complain, or if there is any mistake in the order, please let us know at once so that we can rectify the mistake.

It is to be thoroughly understood that we accept any and all orders with the provision that they shall be void, should any injury befall our stock over which we have no control. All orders are subject to any new Government regulations.

Reference. As to our standing and responsibility, we refer you to any bank or business house in Mobile, as well as the better known nurserymen and florists in this country.

● Azaleas ●

AZALEAS •

THIS season we have more Azaleas to offer to our customers than ever before. We have increased our production and have more experienced men to work with the stock; consequently we can give much better value. We have thousands of these plants growing under our sprinkler system, in a mixture of peat and good Semmes, Alabama, soil. They have wonderful foliage and heavy root systems and should be a good money-maker for all pot-plant dealers as well as nurserymen and landscape architects.

These plants can be moved almost any time during the year but if you want to give better satisfaction, and of course make more money selling them, get them early, before they start blooming. You will get the benefit of the blooms the first year and you can make a better display in your customers' gardens.

For nurserymen and growers we have this season nearly a million Azalea liners to offer. To those who have bought them in the past, we need not describe these Azalea liners. We root them in the early summer and transplant to our hotbeds in specially prepared soil. The beds are covered with sash and the plants grow all winter. They are well rooted and branched for spring delivery. We usually start shipping the liners about the last week of March.

We grow most of our Azaleas under lath shade, although we are growing certain varieties in full sun now. We advise you to grow them in partial shade for the present. It will pay you to prepare your beds well and use plenty of peat. Also you will find in most instances that it pays to use fertilizer more often—about three times during a growing season at least. Remember that the beds must be well drained at all times.

These plants are very easy to grow and if you once use them in your landscaping, you will always use them. If you could see the Azaleas in bloom in Mobile County just once, you would understand better how to use them in your gardens.

KURUME

Azaleas

AZALEAS •

KURUME AZALEAS

These are most popular, as they are used extensively in pots and also in landscaping for borders as well as mass planting in beds. As a pot plant there is nothing we know of that is superior. We urge you to try a few if you are not already using them.

Christmas Cheer. Hose-in-hose; small, deepest red. Small foliage; compact growth. One of the best for florists' use.

Copper Bells. Similar in growth habit to Coral Bells. Flower is orange color. A newer addition and an excellent pot plant.

Coral Bells. Hose-in-hose; small, bell-shaped flowers of a beautiful shade of pink. Small glossy foliage; very compact growth. The favorite of florists for pot culture. We have excellent liners of this variety.

Double Mauve. Hose-in-hose; light mauve flowers entirely cover the plant. Its compactness makes it very good for florist use.

Hexe. Hose-in-hose; large, deep red. Excellent dwarf compact growth. Very much in demand.

Hiawatha. Hose-in-hose. Large, dark red. Compact plants.

Hinodegiri. This is a very popular bright red variety. The blossoms cover the plant in such a manner that you can hardly find a leaf when in full bloom. Compact, slow growth. Very desirable as a pot plant.

Hortensia. Hose-in-hose; medium-sized, delicate pink. Round, fairly large, shiny foliage; heavy but not tall grower.

Mme. Pericat. Hose-in-hose; large, light pink flower. Late bloomer, fast grower and very showy.

Salmon Beauty. Hose-in-hose; large, salmon color. Compact growth. Very showy plant and an excellent variety for pot culture.

Salmon Queen. Larger-sized flowers than above, but single and lighter in color. This is a good variety, very popular as a pot plant.

Snow. Hose-in-hose; pure white flowers cover the plant. Fairly large, dark green leaves. Very popular with the florist.

PRICES OF KURUME AZALEAS

	10	100
Liners from beds		\$10 00
4 to 6-in. budded plants	\$4 00	30 00
6 to 8-in. budded plants	5 50	50 00
8 to 10-in. budded plants	6 50	60 00

INDICA AZALEAS

These Azaleas are the most showy of all in the gardens of the South. The blossoms are larger and the plants grow much faster, making very large specimens in a few years' time. They are wonderful shrubs for landscape use, with dark green foliage all during the year and beautiful flowers in the spring. You can be assured that when you plant an Indica Azalea garden for your client, if you do a good job you will have his gratitude for all time. Then, too, these plants can be grown in much colder climates than was thought a few years ago.

Elegans. Light pink. Heavy foliage; fast-growing, well-shaped plant. Early bloomer.

Fielder's White. One of the best whites among the Indicas. Dark green, hairy foliage; excellent growth.

Fisher Pink. Light pink. Blooms about the same time as Pride of Mobile. Very good, compact growth.

Formosa. Large purple flowers, somewhat lighter than Phoenicia. Large, thick foliage; probably the fastest grower of all the Azaleas.

George L. Taber. A sport introduced by Glen Saint Mary Nurseries. Fast grower; light green foliage. Pink and white variegation.

Indica Alba. Pure white. Light green, hairy foliage; upright growth. Very hardy.

Phoenicia. Light purple. Dark green foliage and fast, compact grower.

President Clay. Orange-red. Fast, upright growth; midseason bloomer. Very good.

Pride of Mobile. Beautiful watermelon-pink—probably the most popular of all Indicas. Large foliage; fast growth, similar to that of Formosa. In Mobile there are plants nearly one hundred years old that are still blooming profusely. The blooms so completely cover the plants at the height of the season that scarcely a leaf is to be seen.

Salmon (Lawsal). Medium-sized, salmon-colored flowers. Good upright growth. One of the best; known to nurserymen in the South as Daphne Salmon.

PRICES OF INDICA AZALEAS

	10	100

10 to 12-in. budded plants	4 50	40 00

Camellia Japonica

THESE beautiful aristocrats of Southern gardens are each year gaining more in popularity than any other shrub known. The various Camellia shows that are being held each season all over the country bear evidence of this, and part of the credit for the popularity of the Camellia is due to these shows. The organization of the American Camellia Society has created a great deal of interest. If you are selling Camellias, you should join this Society and ask your customers to do the same. It is bound to bring you more business. Address Prof. R. J. Wilmot, Gainesville, Florida, for application blanks.

There is and always will be quite a lot of argument in regard to Camellia names. We are listing each variety by the accepted name used by the majority of growers. No doubt some of these will be changed in the years to come as some are being changed now, and when this happens we will always list each variety by as many names as we know it to be sold under. This will prevent you from duplicating varieties.

We are trying to grow all of the better varieties, and not trying to introduce a lot of new seedlings that are good only for understock. We hope to increase our list of varieties as long as we can find new ones to buy that we believe are worth growing. We use several thousand plants each year for understock and we also sell plants for understock, so we use the poorer flowering sorts for this purpose. We also use many *Camellia Sasanqua* for understock and find it sometimes works better than *Camellia japonica*.

This year we cannot recommend too highly our lining-out grade—8 to 12 inch. These plants are about the finest we have ever grown and we feel that you should get them as early as possible. By all means place your order early. We had to disappoint many customers last season.

Although some customers plant this size direct to the field, and we plant in open beds under our sprinkler system, it might pay you to grow them in partial shade similar to lath house for one year.

We like to clean out all our beds by the latter part of November. If you want your plants later, please let us have your order soon so that we can reserve your needs.

All of our Camellias are transplanted many times and have a wonderful root system. We are sure you will find none better anywhere, and once you use some of our plants you will like them. We know you can please your customers with them.

We are again listing our 3 to 5-inch bed-grown liners for delivery in spring. These plants have been transplanted into beds from greenhouses and have developed a good root system. They will be ready about the middle of March.

We are listing our Camellias in groups for convenience in pricing. The scarcity, demand, and quality of the blooms determine the group they are listed in. We are not in position to offer liners in all groups, but will as soon as our stock will permit.

CAMELLIA JAPONICA, MATHOTIANA VARIANT

Standard Camellias

GROUP I

Alba Plena. One of the oldest and best-known Camellias. A pure white, full, double sort that is preferred for corsage use. Very susceptible to cold damage. Liners only.

Brilliant. Local name. An excellent variety. Large, very double, bright red. Compact grower with dark green foliage.

Elegans (Chandleri). Rich cherry-red with white variegation. Large flower, 5 to 6 inches in diameter, some of loose peony form and others with thick peony flowers, all on the same plant. Leaves are rich shiny green. One of the best and most popular of all.

Herme. Large, semi-double to peony-form flowers of pink, white and red variegation. One of the few varieties that are faintly fragrant. An excellent garden variety.

Monarch. Very large, deep pink with white variegation. The stamens are so intermixed that often one single flower will resemble a bouquet. Very compact growth; dark green foliage.

Pink Perfection (Frau Minna Seidel). Very popular shell-pink that is early and blooms very freely.

Prince Eugene Napoleon (Pope Pius IX). Large, double red flowers. Good growth; light-colored foliage. Very popular, and profitable to grow.

Professor C. S. Sargent. Crimson flowers of peony form. Excellent grower, early blooming.

24 to 30 in., B&B from fields.		45 00

GROUP II

Jarvis Red. Large, semi-double, deep red flower with the stamens showing very prominently. Dark green foliage.

Mme. Strekaloff (Belle Romana). Large flowers profusely streaked crimson. Very upright and strong grower. Thick, glossy foliage.

Sarah Frost. One of the most common and hardiest of this section; always gives some flowers. Rose-pink, of medium size. Very compact-growing plant.

Semi-Double Blush (Celtic Rosea). Beautiful, semi-double, light pink blooms fading to almost white, with yellow stamens. This is an excellent garden variety that will open up even after severe cold.

Mixed. In this lot we have plants for use as understock or just shrubs. Some of them are single but most are semi-double and all are fast growers, which means they are good for understock. We are not selling them as named varieties and ask you not to expect good flowering sorts in this group.

CAMELLIA, ALBA PLENA

CAMELLIA JAPONICA, ELEGANS (CHANDLERI)

CAMELLIA JAPONICA, DONKELAARI

Rare Camellias

GROUP I

Adolphe Audusson Variegated. Very large, semi-double, red and white. One of the very best and should be in all collections.

Aspacia. Large, peony-form, red and white blooms. Dark green foliage with some variegation. Fast grower.

Big Beauty. Large, white, blotched and dashed with pink. Good grower. Large, light green foliage.

Daikagura. One of the very earliest Camellias to bloom. Deep rose-pink flowers, sometimes streaked and blotched with white.

Davis Rose Dawn. A very beautiful rose-pink Camellia of large size, introduced by one of our local nurserymen. Very vigorous grower with dark green foliage. Much in demand.

Donkelaari. We have the true stock of this fine old variety from Tea Gardens, Summer-ville, S. C. We consider it the best of this strain, having more white than most. Very large, semi-double, red marbled white. Slow grower.

Duncan Bell (Mrs. Mena Ladnier). A large, peony-form flower named for the owner of the famous Bellingrath Gardens. Red flowers 5 to 6 inches in diameter. Very fast grower.

Eleanor Haygood. Magnolia Gardens variety. Pale pink, almost blush-color, medium to large flower and when fully open has a few stamens. Very desirable Camellia.

Eleanor of Fairoaks. Peony-form flower with stamens showing in small petals and petaloids. This is a variegated form of Vedrine, a very popular red Camellia.

Firegold (Dr. Sheppard; Tea Garden No. 4). Very large, loose peony-form, dark red bloom, marbled white, with a mass of golden stamens in the center. Round, dull green foliage. Very upright growth.

Flame. Very large, semi-double, red. An excellent variety for colder sections, as it will open where most other sorts will fail. Long, pointed, slightly twisted foliage. Very good grower.

Glen 40. Large, deep flower of very dark red. Slow grower but one of the best double red Camellias.

Haku-Tsuru (14 B; White Crane). Large, excellent white resembling Victor Emanuel in size and shape. Tall, loose grower. A good variety.

La Reine Variegated. Semi-double flower 5 to 6 inches in diameter, deep pink to red, blotched with white. Very attractive and outstanding Camellia.

Lady Jane Gray (Donkelaari; Eugene Lizze). Peony-form sport of Donkelaari, having same coloring and growth habit. A very fine Camellia admired by all who see it.

Lindsay Neil. One of the most sought-after Camellias this season. We have the stock of the original plant in Columbus, Georgia, and are proud to offer it.

Lotus. Very large, pure white, semi-double. Long, narrow, light green leaves. One of the very best semi-double types, and one of the largest.

Magnoliaeflora. Blush color, semi-double. Good compact grower with very shiny leaves. This is the most prized of all Camellias that we have to offer in any quantity and should be in every collection.

Marion Mitchell. This is the finest red seedling to come from the many superb ones in Magnolia Gardens. Very large, semi-double, scarlet-red. Sometimes has a few petaloids intermixed with stamens. Dark green foliage, long and pointed.

Mme. Chiang Kai-shek. Fast-growing Camellia with large, dark green foliage. Flower is very large, of the Donkelaari type, crimson-red mottled with white.

Mrs. Charles Cobb. One of the darkest red Camellias we know—almost black. Rich golden stamens intermixed with petals. Very fast grower with rounded, light green foliage. We highly recommend this variety.

Rosea Superba Variant. Unusually large, light pink flower with white variegation. We do not have solid color. Very much like Mathotiana Variant except for color. Fast grower and considered one of the best. It should by all means be in every collection.

Woodville Red (Martin Roberts). Very large, peony form, strawberry-red. This is one of the newer varieties for this section and is excellent for any collection.

CAMELLIA JAPONICA, MONARCH

Rare Camellias

GROUP II

Casa Blanca. Medium rose-pink; formal, double. This Camellia opens over a long period and is beautiful in every stage. Its lasting qualities will make it a good cut-flower variety.

Catherine Cathcart. Medium size, double, light pink, marbled white. Large, round, light green foliage. A good grower and a fine Camellia.

C. N. Hastie. Medium to large, very dark red, peony-like flower. Dark green, round foliage and good grower. A very nice dark red Camellia.

Colonel Firey. Very double, well-shaped flower, 5 to 6 inches across, of brilliant crimson. One of the best red Camellias. Said to be true C. M. Hovey.

Debutante (Sara C. Hastie). Large, peony-form, light pink blooms; early. Fast grower with large, serrated leaves of dull green. Very desirable.

Emperor of Russia. Very large, deep scarlet, peony-form flower, with stamens intermixed. Large, dark green foliage. Excellent grower.

Firebrand. Large, scarlet-red, semi-double flower with rich golden stamens in center. Very upright growth, and one of the hardiest bloomers over a long period—starts early and blooms late. Cold doesn't seem to damage the flower buds.

H. A. Downing. Large, semi-double, bright red, with stamens in center. Medium dark green foliage and loose spreading growth. Free bloomer.

Il Tramonto. Not Laurel Leaf. Medium-sized, formal double, rose type. Resembles Laurel Leaf but smaller flower, stockier growth and foliage is round.

Imura White. Very showy, semi-double flower about 5 to 6 inches across, with large petals. Fast grower with long, narrow, shiny leaves.

Lady Clare (Empress; Grandiflora Rosea). Clear rose-pink, with two rows of petals and golden stamens. One of the largest, sometimes measuring 6 inches across. Dark green foliage; spreading growth.

Lady Van Sittart Variegated. Large, semi-double, red flower with white variegation. Small, narrow, pointed, dark green foliage.

Laurel Leaf. A very large, full double variety of beautiful texture; incurved petals. Most flowers have rose-pink centers and merge into deeper pink at edge, but sometimes come with white blotches. Excellent for greenhouse culture.

Marchioness of Exeter. Large pink flowers of peony form, resembling a bouquet.

Margaret Higdon. Large, semi-double, pink bloom, fading to almost white around edges of petals, with stamens intermixed. Large foliage, somewhat serrated.

Mathotiana Rubra (Purple Emperor; Purple Dawn; Wm. S. Hastie). Very large, deep red flowers turning purple as they age, and showing stamens when fully open. Fast grower with large, dark green foliage.

Mathotiana Variant (C. M. Hovey). Very large-flowering type, similar to Purple Emperor except for white blotches through the flower. One of the very best in flowering as well as growth. Large, dark green foliage with some variegation.

Rev. John Bennett. True stock from original plant in Magnolia Gardens. Large, semi-double, salmon-pink. Fast, willowy grower. An excellent Camellia.

Shiro-Botan. Local seedling. Large; white. Good grower. Medium-sized, light green foliage. A very good white.

White Hibiscus. Local seedling. Large, single to semi-double flower with long, narrow, snow-white petals. Foliage is long, narrow, and crinkled.

CAMELLIA JAPONICA, MRS. K. SAWADA

CAMELLIA JAPONICA, MATHOTIANA RUBRA

Rare Camellias

GROUP III

Alba Superba. Large, semi-double, pure white; large petals with yellow stamens showing in center. Fast grower with large, dull green leaves.

Fanny Bolis. Very large, almost single, red flowers blotched with white. Large, dark green foliage; good growth.

Frizzle White. Semi-double, medium to large, waxy pure white flower, intermixed with many yellow stamens. Leaves are narrow and light green.

Goshoguruma. Single, deep velvety red with golden stamens. Medium-sized, full green foliage. Slow, very upright growth.

Kumasaka. Large, semi-double, deep pink, showing stamens. Good growth and bloom.

Mme. Adele. Large, rose-pink, peony-form bloom of very loose construction, with yellow stamens intermixed.

Monjisu. Very nice Camellia. Deep red, splashed with white; very prominent stamens. Dwarf grower; blooms while young.

Pink Ball. Light pink, medium round flowers with regular outer petals and inner petaloids interspersed with stamens. Dull green foliage of medium size. Very prolific bloomer and starts blooming while young.

Victor Emanuel. Unusually large, peony form, very deep red. Very spectacular red Camellia and probably one that will sell at higher price for many years to come. Excellent grower and late bloomer. We have some exceptionally good buys in this variety.

CAMELLIA, MONJISU

CAMELLIA SASANQUA ROSEA

CAMELLIA SASANQUA, SNOW-ON-THE-MOUNTAIN

Camellia Sasanqua

THESE handsome flowering evergreens offer a wonderful opportunity to nurserymen all over the South. They grow and do well in sections where *Camellia japonica* is a failure, and can be used for screens and hedging, trimmed or otherwise, while the individual plants make fine specimens.

Nurserymen in the vicinity of Fort Worth, Memphis, Birmingham, Atlanta, and all up the Atlantic coast-line and most of the Pacific Coast will be doing their clients a great service and will be well repaid for lining out some of our liners of Sasanqua. They make a much better showing than ordinary broad-leaved evergreens and shrubs, even when not in bloom, and when they come into flower they will add distinction to any garden.

We have heard reports from certain sections of the country where *Camellia japonica* does not do so well, that grafting on *Camellia Sasanqua* enabled these nurserymen to grow many varieties of japonica. This was not where the temperature prevented the growing of japonica, however. We do know that most Sasanquas will stand more abuse than any japonica. We have seen them grow in wet ground where japonica would not grow. We are using more and more *Camellia Sasanqua* for understock each year. The demand for it as understock has increased considerably in the last few years, almost depleting the supply of sizes suitable for landscape use. We advise you to cover your needs on this item as early as possible.

Camellia Sasanqua, Dawn. Semi-double, white shaded pink. One of the hardiest and very beautiful. Limited number to offer this season.

3 to 5-in. liners, from beds,	10	100
semi-bare root		\$20 00
